

HOUSE OF REPRESENTATIVES

STATE OF HAWAII
STATE CAPITOL
HONOLULU, HAWAII 96813

May 23, 2016

The Honorable President Barack Obama
The White House
1600 Pennsylvania Avenue, NW
Washington, DC 20500

Dear President Obama:

We in Hawaii have watched North Korea make significant advances in warhead miniaturization and rocket technology, belligerently tested long-range missiles in the face of international protests, and flexed its military muscle at every opportunity. It would only take 20 minutes for a missile launched from North Korea to reach the islands.

It is not unimaginable that North Korea could hit Hawaii, Alaska or the U.S. mainland with an intercontinental ballistic missile, or to assume it has the ability to miniaturize a nuclear weapon and put it on an ICBM. If there is any lesson to be learned from the events at Pearl Harbor that prompted our nation's entry into the Second World War, it is that we should not and cannot be complacent when it comes to global aggression and our own national defense.

In the face of these facts, we understand that the Pentagon is studying the possibility of switching an "Aegis Ashore" missile system and launcher on Kauai from testing to operational mode and adding radar to track incoming missiles. Converting the Aegis Ashore on Kauai from a test facility to an operational one for the ballistic missile defense of Hawaii offers us the best chance to protect these islands from a missile attack from North Korea.

We have an opportunity to strengthen the defense of this nation's westernmost state and its military headquarters in the Pacific, and, more importantly, create a deterrent for such aggression in the first place. We have an existing site for the Aegis Ashore at the Pacific Missile Range Facility on Kauai. Its operational conversion not only makes good sense, it may very well be key to the survival of this state and its people.

TO: President Obama

Date: May 23, 2016

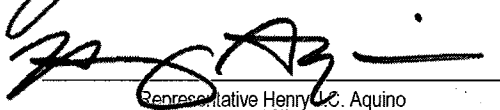

Page: 2

We urge you to do whatever you can to facilitate and accelerate the process of converting the Aegis Ashore at the Pacific Missile Range Facility on Kauai. We know you share our concern and thank you for your continued support in this matter.
