## NORAD & USNORTHCOM Missile Warning & Defender of the Year

On May 12, 1958 NORAD was established for the defense of Canada and the United States. The inaugural NORAD & USNORTHCOM Missile Warning & Defender of the Year award ceremony took place on May 3, 2013. The event recognizes and honors members of the U.S. and Canadian military and civilians who reflect the utmost commitment to excellence in their mission to defend the North American continent. They are a true inspiration to their subordinates, peers, and superiors. They have demonstrated leadership that goes above and beyond for the good of their countries.

The purpose of the NORAD & USNORTHCOM Missile Warning & Defender of the Year event is to recognize exceptional individuals in missile warning and missile defense in their role as defenders of the homeland and citizens of Canada and the United States. Furthermore, we recognize those leaders to help educate both the Canadian and American public on their vital role in the preservation of peace.

---

*We want to thank all those who have supported MDAA for over a decade to fulfill its mission to educate the American public on the need for our nation to develop and deploy missile defense.*

## ABOUT MDAA

### The Missile Defense Advocacy Alliance

MDAA's mission is to make the world safer by advocating for the development and deployment of missile defense systems to defend the United States, its armed forces, and its allies against missile threats.

MDAA is the only organization in existence whose primary mission is to educate the American public about missile defense issues and to recruit, organize, and mobilize citizens to advocate for the critical need of missile defense. We are a non-profit organization that does not advocate on behalf of any specific system, technology, architecture, or entity.

MDAA was founded by Riki Ellison in 2002 to generate public support through education for the continued testing, development, and deployment of missile defense systems.
